

# VARIATION ON A GINGLENOOK THEME

A 4/6 Conundrum in the scale of G

Composer Gavin Sowry Op.1

**PRELUDE.** You have before you, the classic Inglenook model railway shunting and switching layout, together with a train consisting of a locomotive and 6 wagons, one of which is the Guard's Van, in its proper place at the rear of the train. Your task is to place the said Guard's Van into the appointed siding for servicing. The headshunt will only hold a locomotive and 3 wagons, and the sidings hold 2 wagons (without fouling the adjacent track).

**GINGLENOOKERY.** Having achieved the prelude, we move on to the classic Inglenook Puzzle, whereby 4 cards are drawn showing the wagons, and order, in which a train is to be made up back on the main line. This is the original classic.

**FINALE.** With all gusto, vent your frustrations by then placing the Guard's Van back to the rear of the train on the Main.
